Straw Rocket and Bottle Launcher

What did you learn or observe about launching rockets?

When you adjusted your design (in step 6), what improved your rocket's flight?
Did anything make it worse? Why do you think that is?

“If I can't find useful equipment to help me with activities, I can design it as an engineer.”

Dana doesn't let her disability hold her back. Can you think of something that could be engineered to make a task easier for yourself or someone you know?

Imagine what it could look like, and draw your design below.
