Muscular System Hand

What did you learn or observe about the muscular and skeletal systems?

Can you think of any other parts of the body that would work with this activity (using cardboard, string, and straws)? *Hint: Think about other places where your body can bend.* Draw your design below.

Ritu studies how we can use robots that work with the human body. Can you think of any ways that robots could work with the human body? Engineers dream up ideas like this, then figure out how to make them a reality!
(examples: jumping higher, improving prosthetic legs, etc.)
