Our Camp Philosophy

All of our camp activities are designed to cultivate creativity, optimism, persistence, systems thinking, conscientiousness, and collaboration – the "engineering habits of mind" outlined by the National Academy of Engineering.

Activities are often framed as engineering challenges, with the educator giving the campers a set of constraints to work within. Many of our engineering challenges are open-ended, with many ways to solve a problem.

We've found that this leads children to solve problems even more creatively. We encourage children to design and build, test, make changes to their design, and re-test so they can experience the engineering design process at work. Campers have many opportunities to practice using all kinds of tools and a variety of materials, and we encourage them to keep engineering with items they have at home.

"I like the knowledge, maturity, and creativity of the teachers. My engineering-obsessed kid looooooves your [camps]."
- Camp Parent

Gateway Scholarships

The Works Museum is dedicated to providing accessible programs to children and families, regardless of their financial situation. Through our Gateway program, a number of 50% and 25% camp scholarships are available. Learn more and download the application at theworks.org/scholarship-application.

Gateway is made possible through the support of our generous community. You can help create opportunities for those who might otherwise miss out on valuable engineering experiences by making a donation at registration checkout or by visiting theworks.org/donate.
